

## Tajik Agrarian University

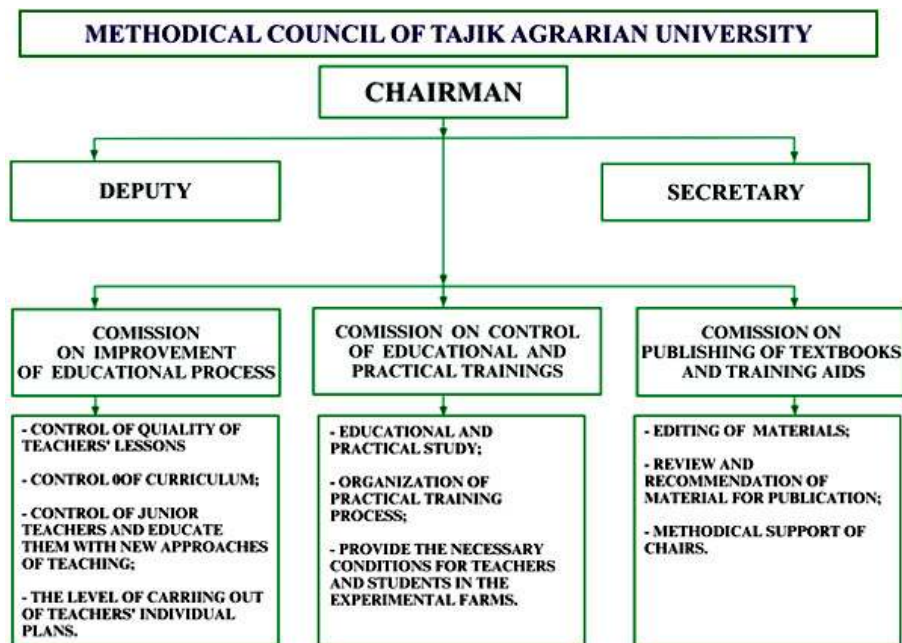

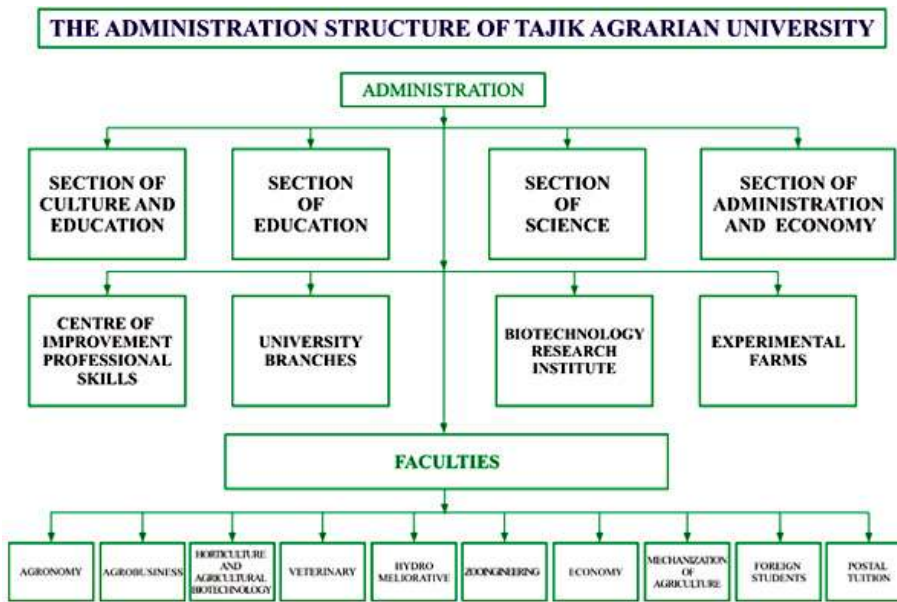

Our Tajik Agrarian University (TAU) is a unique and leading educational institution of the Republic of Tajikistan in the field of agriculture, land use, environment and other sectors of the economy.

In 1934, the Institute was reorganized and renamed the Tajik Agricultural Institute. Currently, Tajik Agrarian University is a center of education and research. University graduates are playing an important role in the development of agriculture and work successfully in the economy.

More than 30 graduates of the University have been elected Academicians and Corresponding Members of the Academy of Sciences of the Republic of Tajikistan and the Academy of Agricultural Sciences, 12 graduates of recognized Heroes of Labor, 300 have received a degree in science, etc. Hundreds of graduates have been awarded the State Prize of the USSR, and Tajikistan.

Currently, the university has nine faculties: Agronomy, Agribusiness, Accounting and Finance, Zooengineering, Veterinary Science, Economics, Horticulture and Agricultural Biotechnology, Agricultural Mechanization, Irrigation. TAU trains specialists in 26 specialties. There are 62 departments in which more than 600 teachers work fruitfully. Among them there are 3 Academicians of Tajikistan, 42 doctors and professors, 125 associate professors. Three years ago, as part of a Tempus project TAU opened a new specialty "Geodesy". This year it is scheduled to open Master "Geodesy and Geo-informatics." Participation in the Tempus project has brought great material and scientific benefits.
