

Tashkent institute of Textile and Light Industry

Tashkent institute of Textile and Light Industry (TITLI) began its work in 1932. At the beginning the Institute started to prepare engineers in four specialties: primary cotton ginning, spinning, silk and weaving technology. The Institute started to train specialties in “Primary processing of bass fires, and “Economy and organizations of textile industry goods”. In 1953 the specialty “technology of sewing production” was opened. “Technology of knitted productions” was opened in 1960. The first chemist-engineers of “technology of chemical fibres” started to practice in 1961. The next specialties were “chemical technology of fibrous goods” and “Textile materials science” in 1966.

At the end of the 1960s and 1970s the institute began to train in four new specialties: “Technology of leather goods”, “Machines and apparatus of light industry productions”, “ Engineer-economist of light industry”, “ Technology of textile machinery building”.

That’s why the Institute was renamed Tashkent Institute of Textile and Light Industry in 1967. The specialty “Technology of printing manufacture” began and it started to train the engineers of “Manufacture and work quota settings” in 1980.

The Institute started to train the specialties in two degrees: bachelor and masters only in 1994-1995.

There are 4 faculties, 25 departments, about 4000 students, 337 professor-teachers, among which 2 academicians, 27 doctor of philosophy, 189 candidates of science and docents at Tashkent Institute of Textile and Light Industry. The Institute trains bachelors in 14 fields and masters in 25 specialties. From the founding of the Institute more than 45000 high qualified specialists have been trained, 700 of them from foreign countries. The academic lyceum of the institute was founded 1998. The Institute is the main base directed to specialized subjects for professional colleges. In recent years at the Institute there were trained 27 doctors, 189 PhDs.

After independence of the Republic of Uzbekistan, the Institute has implemented new international relations.

The Institute is the member of the International Textile Academy, International Printing Educational Association, International Silk Association, and fruitfully collaborates with such leading educational institutes. More than 300 professors, young teachers, postgraduates and students passed probation period at the scientific centers of following countries: Germany, England, Belgium, Japan, Greece, Czech, India, Portugal and others. The staff of the Institute supports traditional relations with the educational institutes of CIS and with scientific-researching institutes of the Academy of the Republic of Uzbekistan. During this period the Institute received more than 6 million US dollars in foreign investments. The Institute is one of the first educational institutes of the Republic and the only Textile Institute in Central Asia. The Institute looks to the future with confidence. Textile, light, and printing industries are developed quickly. Such development requires new cadres, which our institute trains.
